Enhanced Safety Considerations Guide for Hemostasis and Platelet Function Studies

Bio/Data Corporation is Pleased to Provide an Enhanced Safety Considerations Guide for Hemostasis and Platelet Function Studies. This Instructional Reference Document Focuses on Heightened Control Measures for Collecting, Processing, and Testing Specimens and Samples.

During this Unprecedented Time with the COVID-19 Virus, Bio/Data Corporation Felt a Responsibility to Support Laboratories throughout the World. This Guide Recommends to Review and Update all Bio-Safety Practices and the 6 Core Processes. It also Includes Detailed Information on Specimen Collection, Sample Preparation, and Performing Light Transmission Aggregometry Testing. Visit www.biodatacorp.com to Easily Open, Save, and / or Print a Free Guide for your Lab.

For over 40 years, Bio/Data Corporation has been a Leading Manufacturer and Distributor of Thrombosis, Hemostasis, and Platelet Function Products. Bio/Data Corporation provides Instruments, Reagents, Controls, Accessories, Customized Software, and Disposables to Clinical, Research and Pharmaceutical Laboratories Worldwide.

Bio/Data Corporation is an ISO 13485 Registered Company and Worldwide Distributor of Products for Clinical and Research Laboratories.
